

Topographic anatomy of the upper limb

1. Shoulder – *regio deltoidea*
2. Arm – *regio brachii anterior et posterior*
3. Elbow – *regio cubitalis anterior et posterior*
4. Forearm – *regio antebrachii anterior et posterior*
5. Wrist – *regio carpalis anterior et posterior*
6. Hand – *palma et dorsum manus, digitus manus*

External points

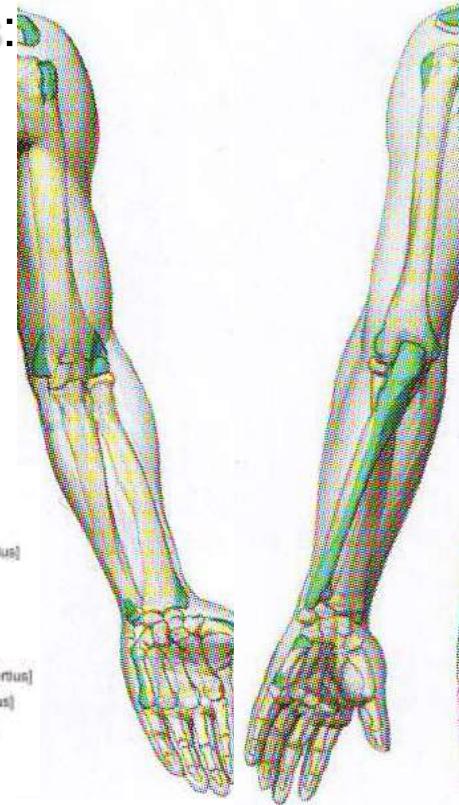

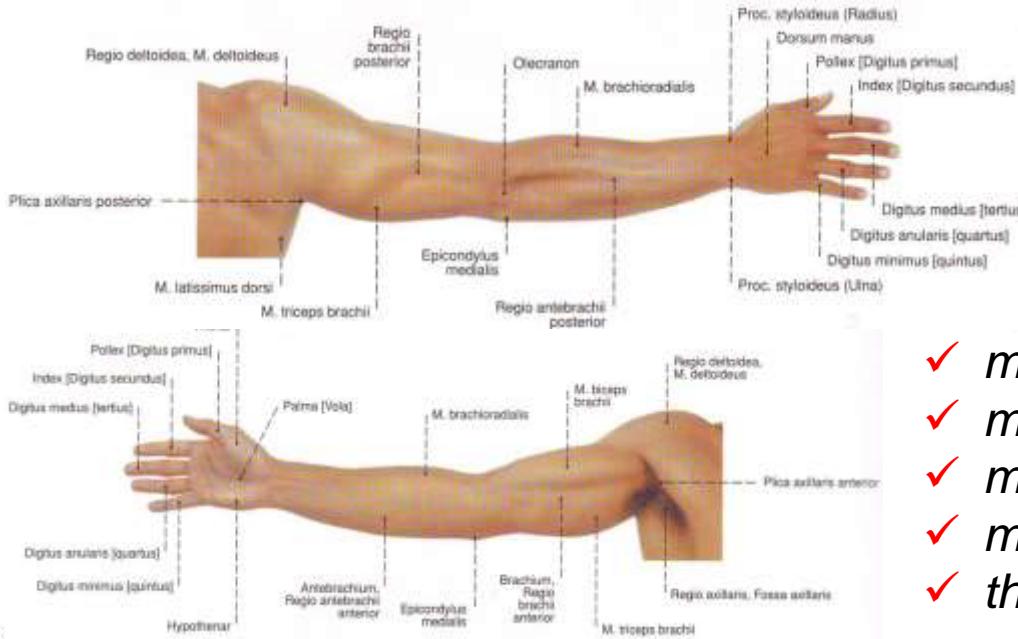

Upper limb

External palpation points

- The bone and muscle palpation points:

- ✓ *processus coracoideus scapulae*
- ✓ *acromion scapulae*
- ✓ *epicondylus medialis humeri*
- ✓ *epicondylus lateralis humeri*
- ✓ *olecranon ulnae*
- ✓ *processus styloideus ulnae*
- ✓ *processus styloideus radii*

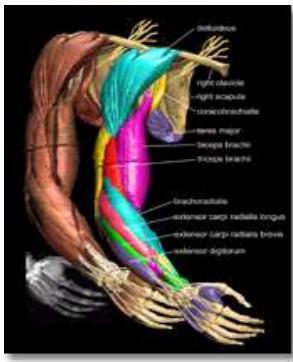

- ✓ *m. deltoideus*
- ✓ *m. biceps brachii*
- ✓ *m. triceps brachii*
- ✓ *m. brachioradialis*
- ✓ *thenar et hypothenar*

Regiones

membri superiores

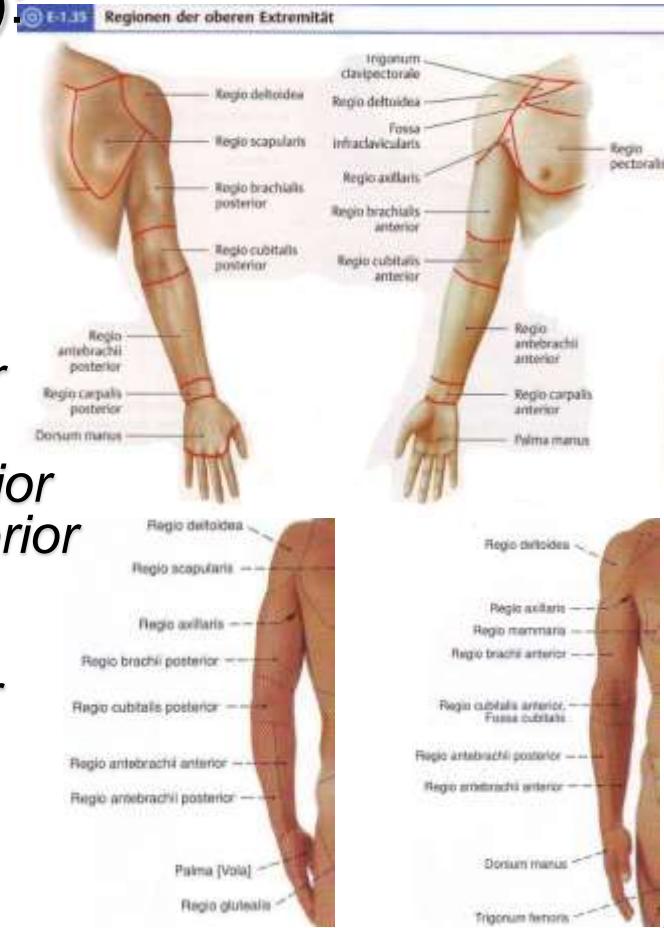

Upper limb

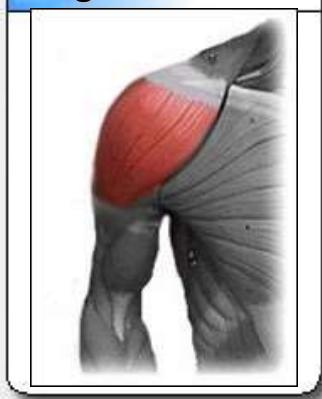

Topographic regions of the upper limb

■ *regiones membra superioris:*

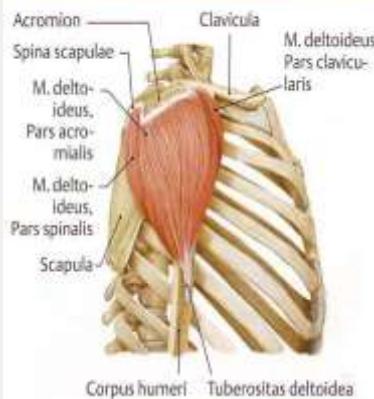

- ✓ shoulder (pectoral girdle):
 - *regio deltoidea*
- ✓ arm, *brachium*:
 - *regio brachii anterior*
 - *regio brachii posterior*
- ✓ elbow, *cubitus*:
 - *regio cubitalis anterior*
 - *regio cubitalis posterior*
- ✓ forearm:
 - *regio antebrachii anterior*
 - *regio antebrachii posterior*
- ✓ wrist, *carpus*:
 - *regio carpalis anterior*
 - *regio carpalis posterior*
- ✓ hand, *manus*:
 - *palma manus*
 - *dorsum manus*
 - *digitus manus*

Regio deltoidea

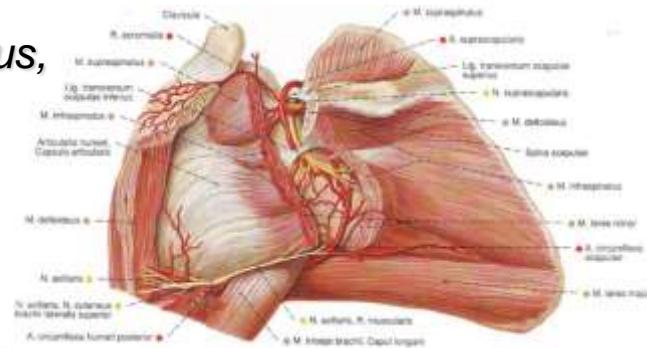

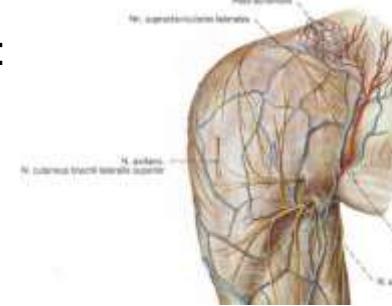

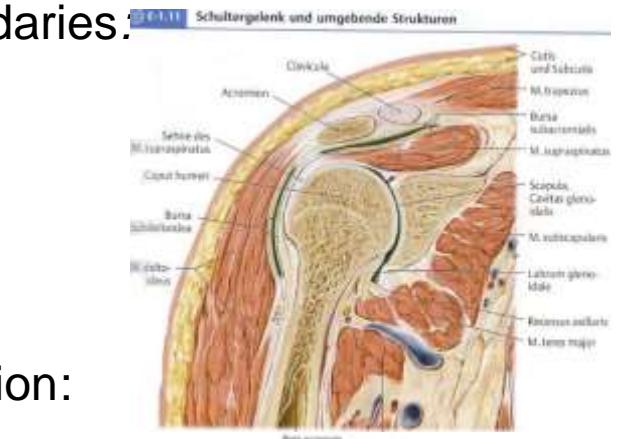

© E-1.16 Musculus deltoideus

Deltoid region, *regio deltoidea*

- boundaries – deltoid muscle boundaries:
 - ✓ superior border:
 - *spina et acromion scapulae*
 - *clavicula*
 - ✓ anterior – anterior deltoid margin
 - ✓ posterior – posterior deltoid margin
 - ✓ inferior – *tuber os deltoides*
 - surface anatomy of the deltoid region:
 - ✓ skin – thick, sleek and mobile
 - ✓ subcutaneous layer – adipose tissue:
 - *n. cutaneus brachii lateralis superior*
 - *nn. supraclaviculares laterales*
 - ✓ *fascia deltoides* – two layers
 - ✓ *m. deltoides*
 - ✓ *spatium subdeltoidicum*
 - ✓ *mm. supraspinatus et infraspinatus, m. teres minor*
 - ✓ *caput longum m. bicipitis brachii*
 - ✓ *m. subscapularis*
 - ✓ *articulatio humeri, capsula articularis*

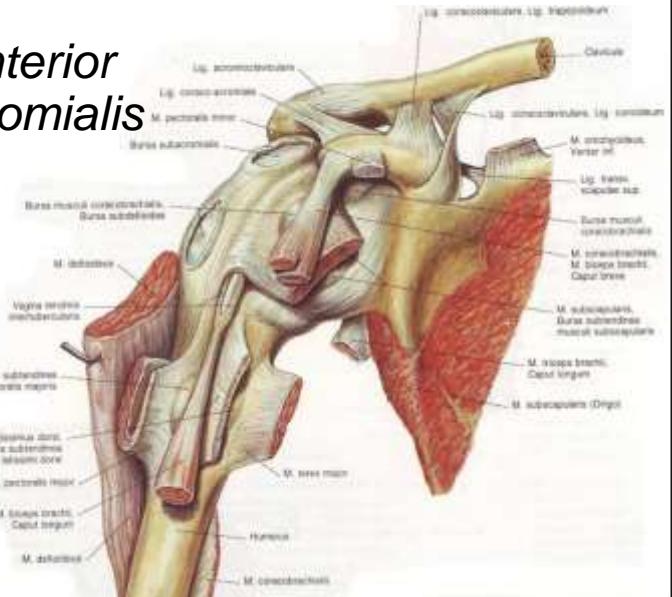

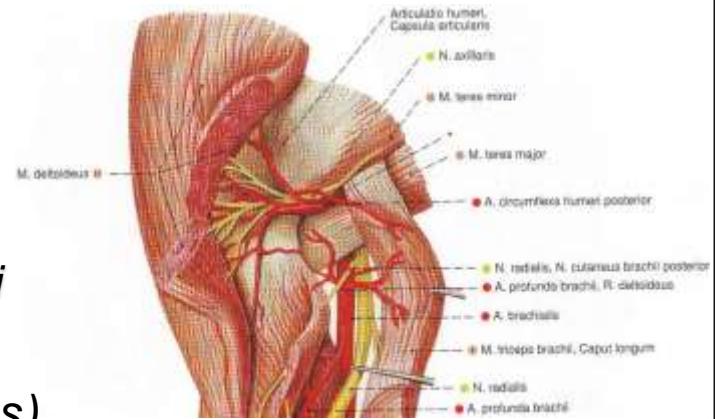

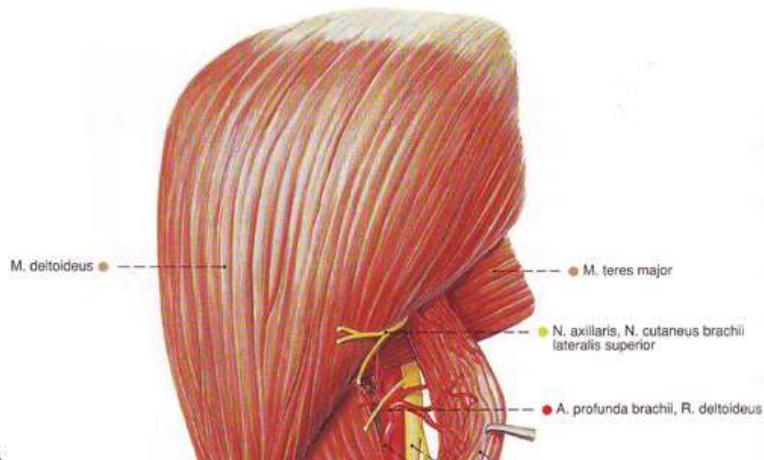

**Spatium
subdeltoidum**

The subdeltoid space

■ content:

- ✓ loose connective tissue
- ✓ deeply – the deep layer of deltoid fascia
- ✓ neurovascular bundle – *foramen axillare laterale*:
 - *a. et v. circumflexa humeri posterior*
 - *n. axillaris*
- ✓ *r. deltoideus (anastomoticus)*
- ✓ *a. profunda brachii*
- ✓ *a. et v. circumflexa humeri anterior*
- ✓ *bursa subdeltidea et subacromialis*

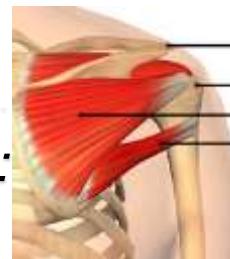

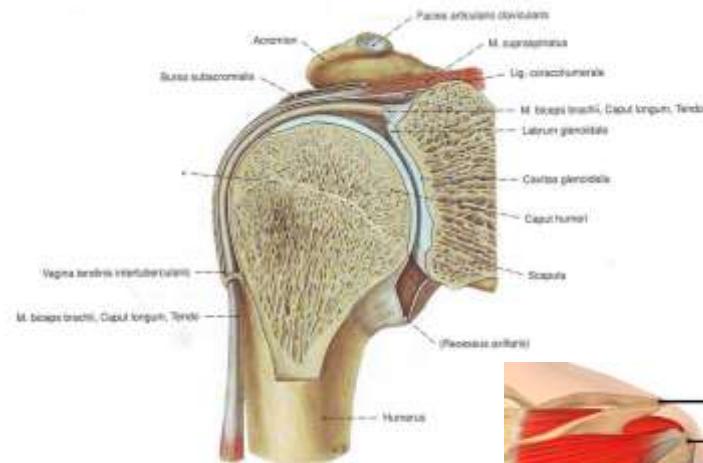

Shoulder dislocation

- ✓ luxatio axillaris
- ✓ luxatio subcoracoidea

Glenohumeral (shoulder) joint, articulatio humeri (glenohumeralis)

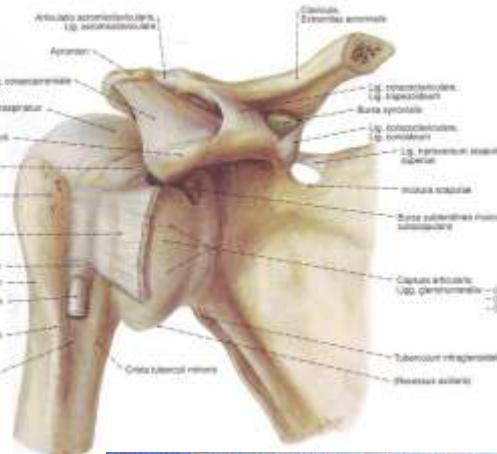

■ capsula articularis:

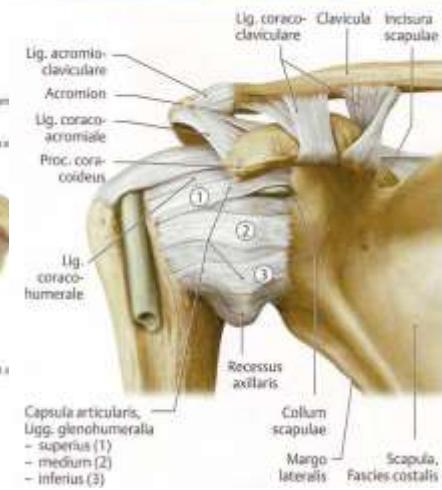

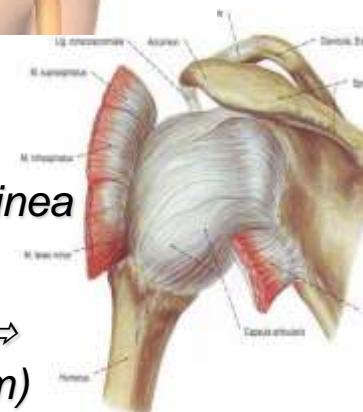

✓ recessus axillaris ⇒ fossa axillaris

✓ recessus subscapularis ⇒ bursa m. subscapularis subtendinea ⇒ fossa subscapularis

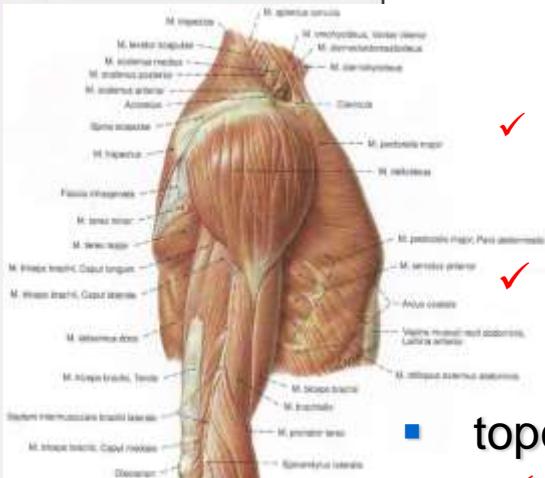

✓ recessus intertubercularis ⇒ spatium subdeltoidem (3-5 cm)

E-1.12 Kapsel-Band-Apparat der Schulter

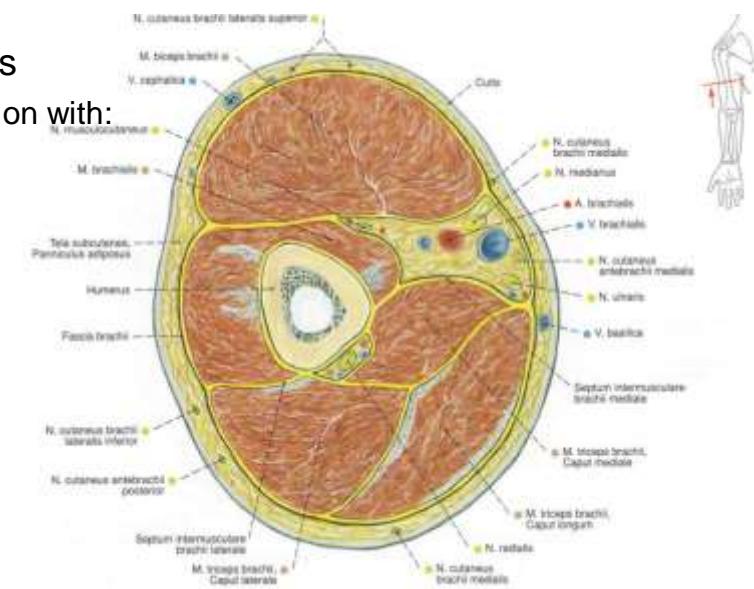

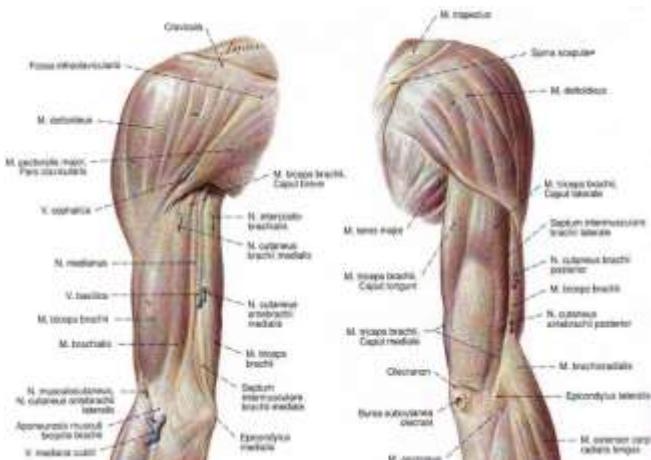

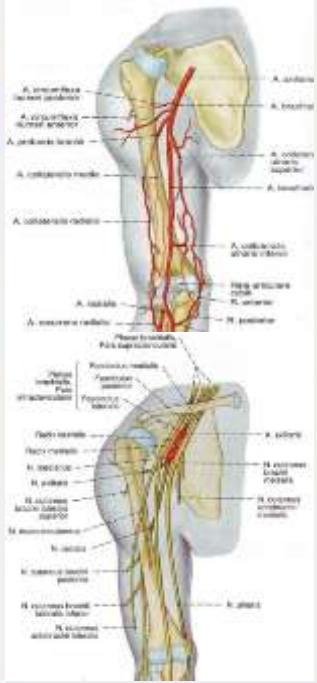

Brachium

- boundaries:
 - ✓ proximal – the line through:
 - *m. latissimus dorsi*
 - *m. pectoralis major*
 - ✓ distal – two-finger width (3-4 cm) proximally from
 - the humeral epicondyles
- compartments of the arm:
 - ✓ anterior (flexor) – communication with:
 - *fossa axillaris* – upwards
 - *fossa cubitalis* – downwards
 - ✓ posterior (extensor) – communication with:
 - *fossa axillaris* – upwards
 - blind end – downwards
 - ✓ **fascia brachii** ⇒ *septum intermusculare brachii, mediale et laterale*
- topographic regions:
 - ✓ *regio brachii anterior*
 - ✓ *regio brachii posterior*

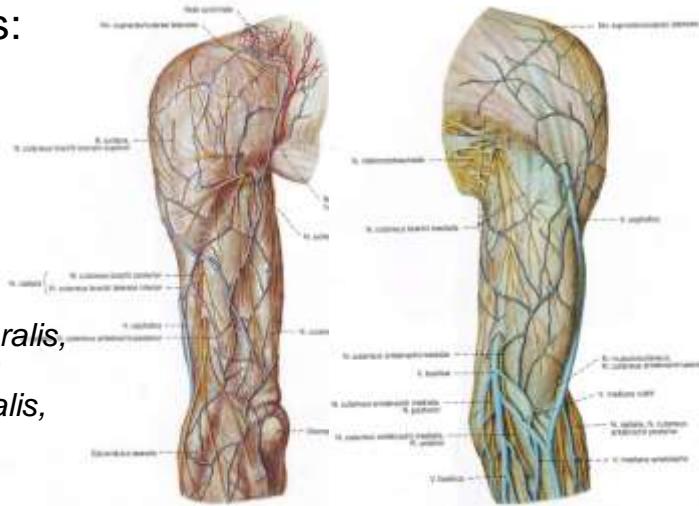

The arm, *brachium*

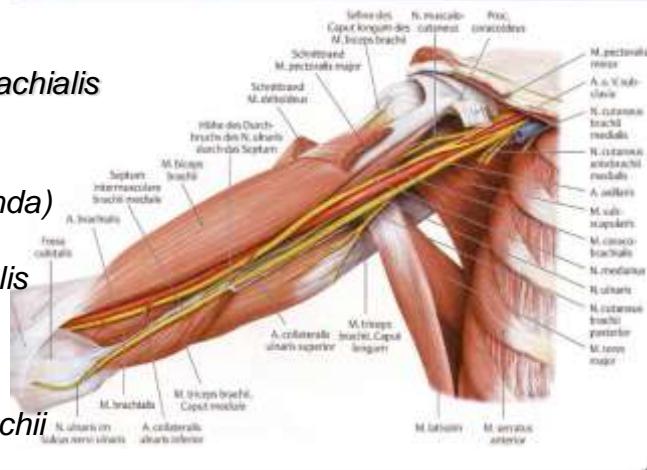

The anterior brachial region, regio brachii anterior

- boundaries – ahead of the humerus:
 - ✓ *sulcus bicipitalis medialis*
 - ✓ *sulcus bicipitalis lateralis*
- surface anatomy:
 - ✓ skin – thin, sleek and mobile
 - ✓ subcutaneous layer – scant fat and loose connective tissue:
 - *v. cephalica* \Rightarrow *sulcus bicipitalis lateralis*, *n. cutaneus brachii lateralis inferior*
 - *v. basilica* \Rightarrow *sulcus bicipitalis medialis*, *n. cutaneus antebrachii medialis* \Rightarrow *hiatus basilicus*
 - ✓ *fascia brachii*
 - ✓ anterior muscle group – two layers:
 - superficial layer – *m. biceps brachii*
 - deep layer – *m. coracobrachialis*, *m. brachialis*
 - ✓ neurovascular bundle of the region – in *sulcus bicipitalis medialis*:
 - *v. et a. brachialis (superficialis et profunda)*
 - *n. medianus*
 - *nn. cutanei brachii et antebrachii medialis*
 - *n. ulnaris* – anteromedially, *a. collateralis ulnaris superior*
 - *n. musculocutaneus* – laterally
 - *n. radialis* – posteriorly, *a. profunda brachii (canalis humeromuscularis)*

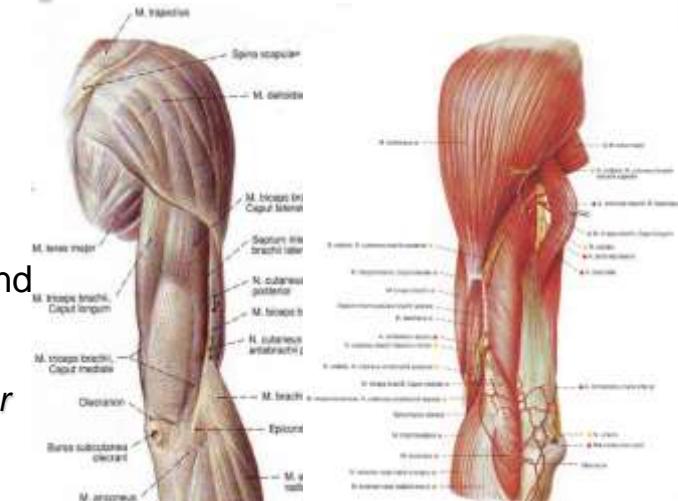

Haupt-Cef3B-Nerven-Straße des Oberarms: Sulcus bicipitalis medialis

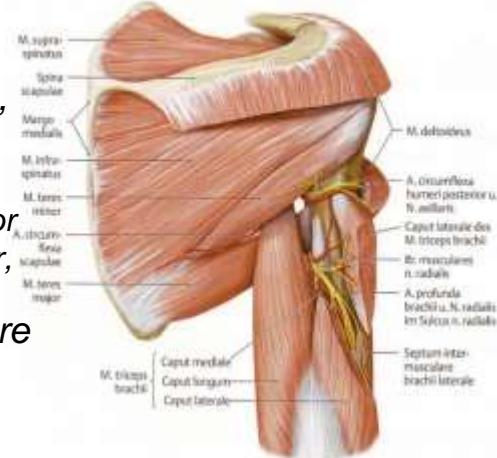

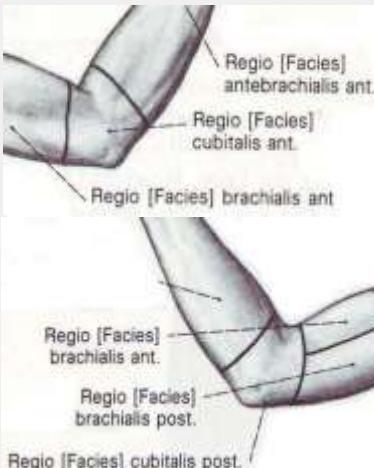

The posterior brachial region, regio brachii posterior

- boundaries – behind the humerus:
 - ✓ *sulcus bicipitalis medialis*
 - ✓ *sulcus bicipitalis lateralis*
- surface anatomy:
 - ✓ skin – thicker and less mobile
 - ✓ subcutaneous layer – abundant fat and loose connective tissue:
 - *n. cutaneus brachii posterior*
 - *n. cutaneus brachii lateralis inferior*
 - *n. cutaneus antebrachii posterior*
 - ✓ *fascia brachii* – comparatively thicker
 - ✓ *m. triceps brachii* – muscle heads
 - ✓ neurovascular bundles of the region:
 - upper – in *canalis humeromuscularis*:
 - *a. profunda brachii* ⇒ *a. collateralis media*, *a. collateralis radialis* (end branch)
 - *n. radialis* – branches in the region:
 - prior to the canal – *n. cutaneus brachii posterior*
 - in the canal – *n. cutaneus antebrachii posterior*, *n. cutaneus brachii lateralis inferior*
 - lower – behind the *septum intermusculare brachii mediale*:
 - *a. collateralis ulnaris superior*
 - *n. ulnaris*

© 0-1-31 Nervus radialis und andere Nerven mit unmittelbarem Kontakt zum Humerus

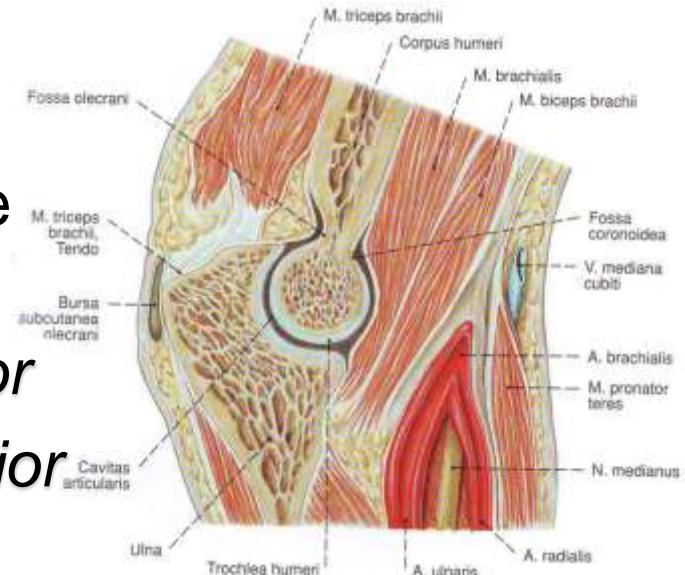

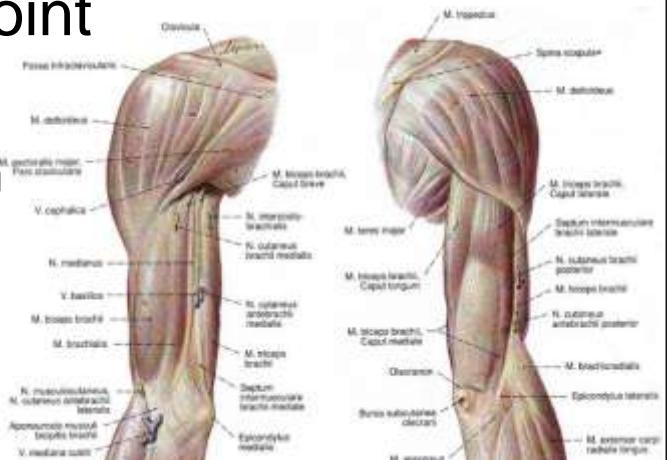

The elbow, *cubitus*

- Boundaries – the elbow joint contours:

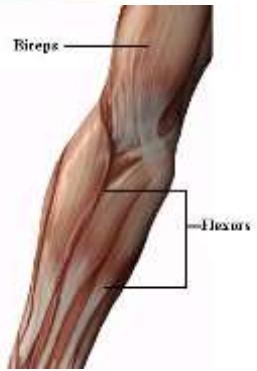

- ✓ proximal – two-finger width (3-4 cm) proximally from:
 - ✓ distal – two-finger width (3-4 cm) distally from the:
 - humeral epicondyles
 - elbow skin flap

- topographic regions – vertical lines through the humeral epicondyles:

- ✓ *regio cubitalis anterior*
 - ✓ *regio cubitalis posterior*

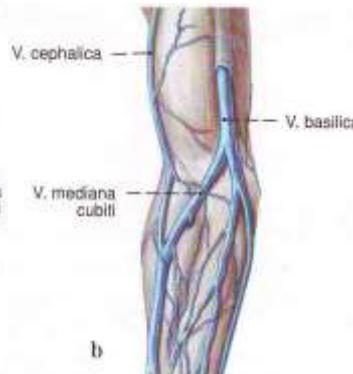

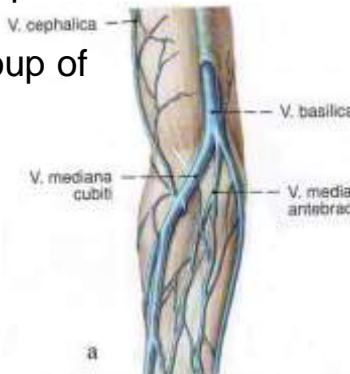

Regio cubitianaterior

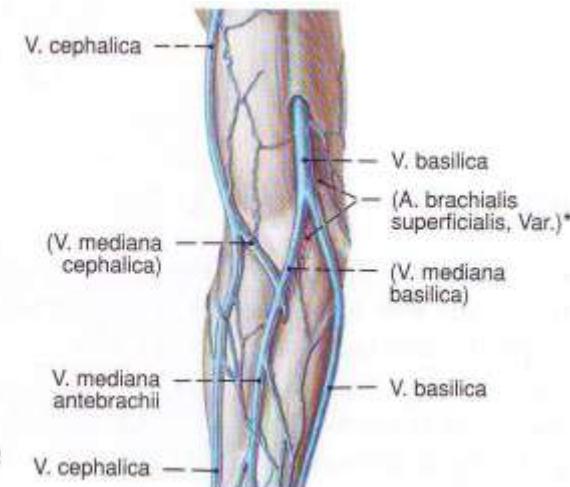

The anterior cubital region, regio cubitalis anterior

- medial elevation – anterior (flexor) group of muscles of the forearm
- lateral elevation – lateral (pronator) group of muscles of the forearm
- middle elevation – the end portions of:
 - ✓ aponeurosis *m. bicipitis brachii*
 - ✓ *m. brachialis*
- surface anatomy:
 - ✓ skin – thin and highly mobile
 - ✓ subcutaneous tissue – sparse fat and loose connective tissue:
 - lateral groove – *v. cephalica*, *n. cutaneus antebrachii lateralis*
 - medial groove – *v. basilica*, *n. cutaneus antebrachii medialis*, *nodi lymphoidei cubitales superficialis* (1-3)
- enlarged and compact in *syphilis secundaria*
 - ✓ *fascia cubiti*, *aponeurosis m. bicipitis brachii*
 - ✓ anterior muscle groups – three groups:
 - medial:
 - *m. pronator teres*, *m. flexor carpi radialis*, *m. palmaris longus*, *m. flexor carpi ulnaris*, *m. flexor digitorum superficialis*
 - lateral:
 - *m. brachioradialis*, *mm. extensores carpi radiales*, *m. supinator*
 - median:
 - *m. biceps brachii*, *m. brachialis*

I-anastomosis – 65%

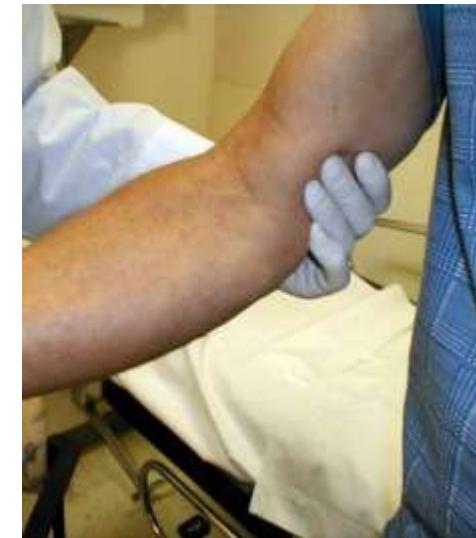

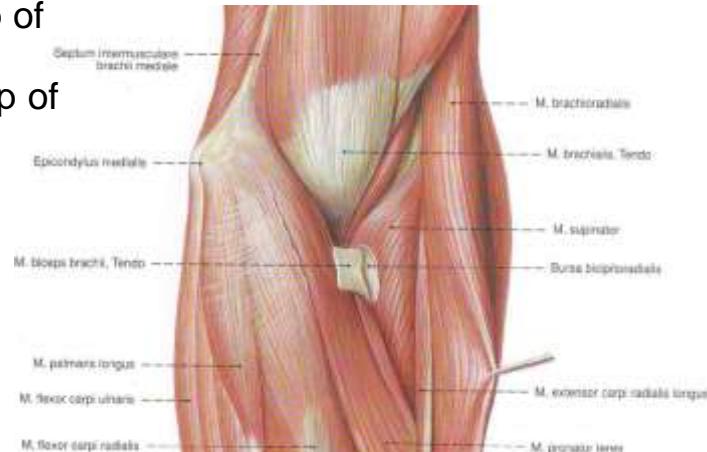

M-anastomosis – 35%

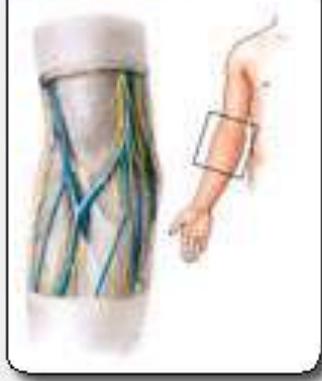

Regio cubitianaterior

The anterior cubital region, regio cubitalis anterior

- medial elevation – anterior (flexor) group of muscles of the forearm
- lateral elevation – lateral (pronator) group of muscles of the forearm
- middle elevation – the end portions of:
 - ✓ aponeurosis *m. bicipitis brachii*
 - ✓ *m. brachialis*
- surface anatomy:
 - ✓ skin – thin and highly mobile
 - ✓ subcutaneous tissue – sparse fat and loose connective tissue:
 - lateral groove – *v. cephalica*, *n. cutaneus antebrachii lateralis*
 - medial groove – *v. basilica*, *n. cutaneus antebrachii medialis*, *nodi lymphoidei cubitales superficialis* (1-3)
- enlarged and compact in *syphilis secundaria*
 - ✓ *fascia cubiti*, *aponeurosis m. bicipitis brachii*
 - ✓ anterior muscle groups – three groups:
 - medial:
 - *m. pronator teres*, *m. flexor carpi radialis*, *m. palmaris longus*, *m. flexor carpi ulnaris*, *m. flexor digitorum superficialis*
 - lateral:
 - *m. brachioradialis*, *mm. extensores carpi radiales*, *m. supinator*
 - median:
 - *m. biceps brachii*, *m. brachialis*

Fossa cubiti

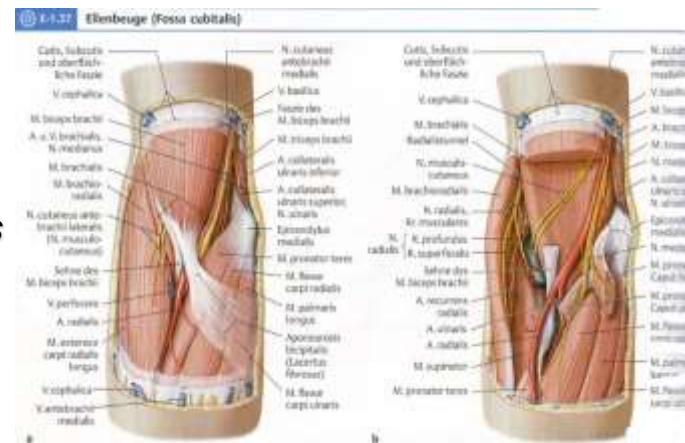

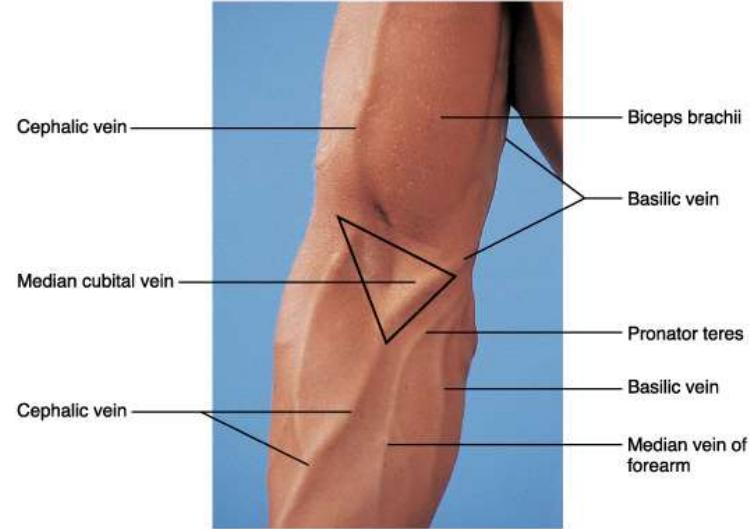

The cubital fossa, *fossa cubitalis*

- boundaries:

- ✓ lateral:
 - *m. biceps brachii*
 - *m. brachioradialis*
- ✓ medial:
 - *m. pronator teres*
- ✓ floor:
 - *tendo m. bicipitis brachii* ⇒ *bursa bicipitoradialis*
 - *tendo m. brachialis*

- content:

- ✓ loose connective tissue
- ✓ medial neurovascular bundle:
 - *v. et a. brachialis* ⇒ *a. radialis* et *a. ulnaris*, lymph nodes
 - *n. medianus*
- ✓ lateral neurovascular bundle:
 - *n. radialis* ⇒ *ramus superficialis* et *ramus profundus*
 - *a. et v. collateralis radialis*, *a. et v. recurrens radialis*
- ✓ *m. brachialis*
- ✓ *art. cubiti, capsula articularis*

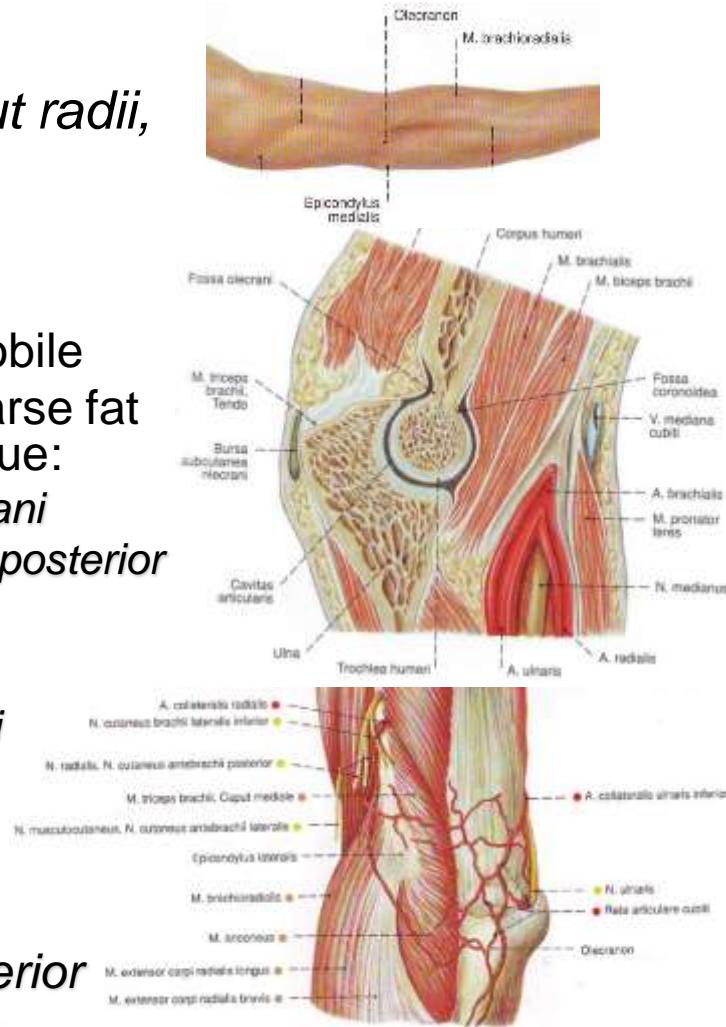

Regio cubiti posterior

Posterior cubital region, regio cubitalis posterior

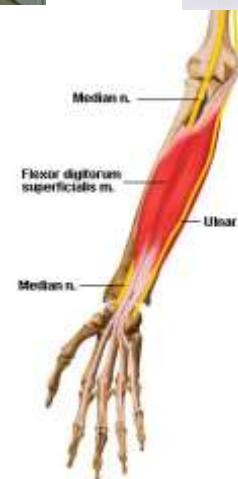

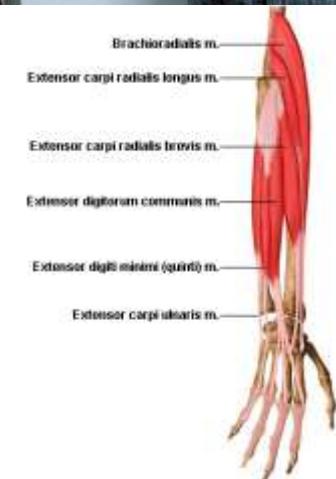

- *olecranon ulnae*
- *fossa pulchritudinis* ⇒ *caput radii, capitulum humeri*
- *sulcus nervi ulnaris*
- surface anatomy:
 - ✓ skin – thick and highly mobile
 - ✓ subcutaneous layer – sparse fat and loose connective tissue:
 - *bursa subcutanea olecrani*
 - *n. cutaneus antebrachii posterior*
 - ✓ *fascia brachii*
 - ✓ muscles:
 - *tendo m. tricipitis brachii*
⇒ *bursa subtendinea m. tricipitis brachii*
 - *m. anconeus*
 - ✓ *n. ulnaris*
 - ✓ *a. collateralis ulnaris superior*

Clinical significance

- lateral epicondylitis (tennis elbow)
- medial epicondylitis (golfer's elbow)

The elbow joint, *articulatio cubiti*

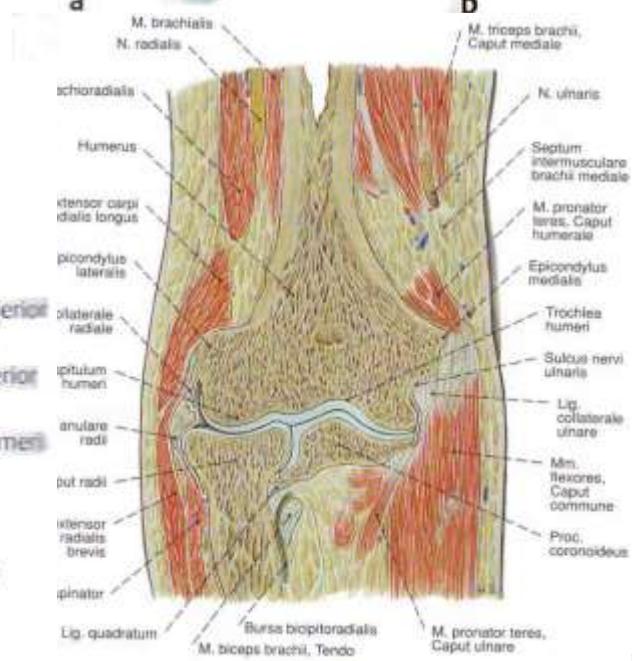

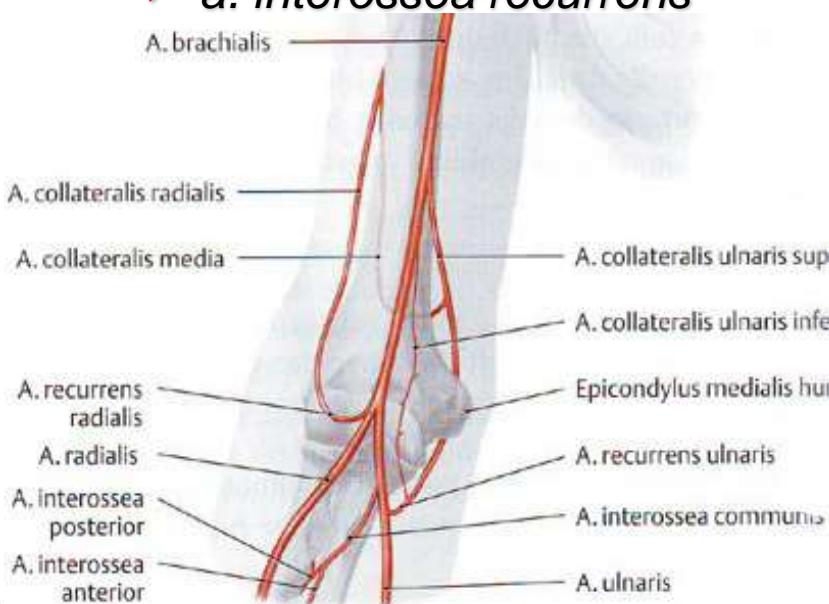

L38

Hueter-Linie und Hueter-Dreieck

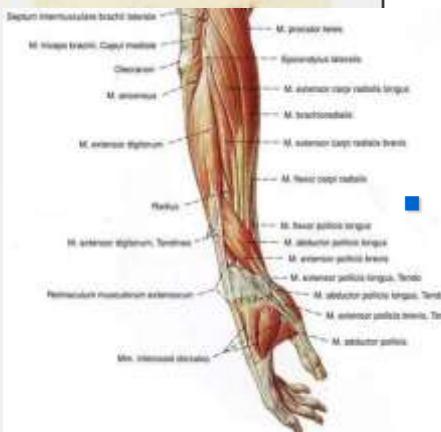

Articulatio cubiti

- *rete articulare cubiti:*
- ✓ *a. collateralis ulnaris superior*
- ✓ *a. collateralis ulnaris inferior*
- ✓ *a. collateralis radialis*
- ✓ *a. collateralis media*
- ✓ *a. recurrens radialis*
- ✓ *a. recurrens ulnaris*
- ✓ *a. interossea recurrens*

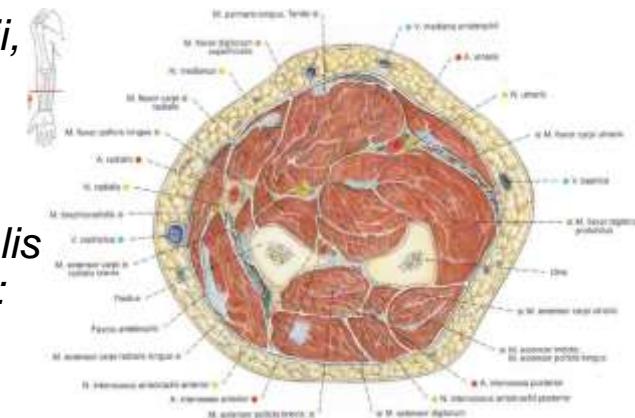

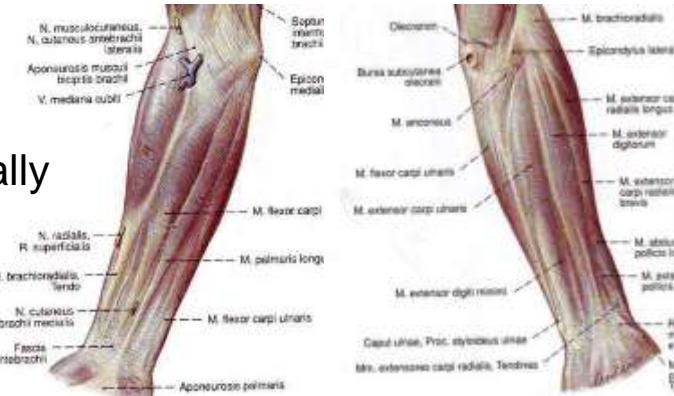

Antebrachium

The forearm, antebrachium

- boudaries:
 - ✓ proximal – two fingers distally from the elbow groove
 - ✓ distal – the line at 1 cm proximally from *processus styloidei, ulnae et radii*
- compartments of the forearm:
 - ✓ anterior – anterior muscle group
 - ✓ posterior – posterior muscle group
 - ✓ radial – lateral muscle group
 - ✓ *fascia antebrachii* ⇒ *septum intermusculare antebrachii, anterius et posterius*
- topographic regions – ulnar and radial longitudinal grooves
(*epicondylus humeri, medialis et lateralis* ⇒ *processus styloideus, ulnae et radii*):

 - ✓ *regio antebrachii anterior*
 - ✓ *regio antebrachii posterior*

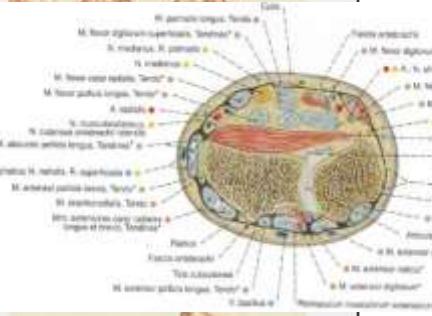

topography

surface anatomy

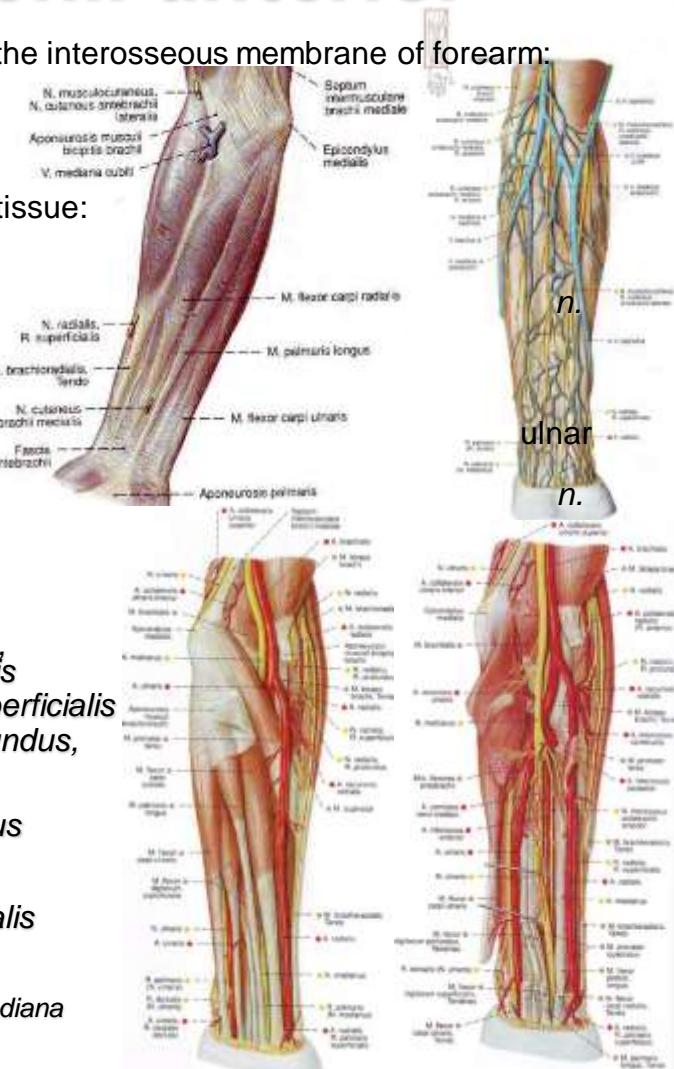

Antebrachium

Fractura

The anterior forearm region, regio antebrachii anterior

- boundaries – ahead of bones of the forearm and the interosseous membrane of forearm:
 - ✓ medial and lateral elevations
 - ✓ muscle tendons – in the distal one-thirs
- surface anatomy:
 - ✓ skin – thin and mobile
 - ✓ subcutaneous layer – sparse fat and loose tissue:
 - v. cephalica, n. cutaneus antebrachii lateralis
 - v. basilica, cutaneus antebrachii medialis
 - v. mediana antebrachii
 - r. palmaris n. medianus \Leftrightarrow median line
 - r. cutaneus palmaris n. ulnaris \Leftrightarrow ulnar groove
 - internervous lines – medianus, n. radialis, n. ulnaris
 - ✓ fascia antebrachii
 - ✓ anterior muscle group – four layers:
 - superficial layer – m. brachioradialis, pronator teres, m. flexor carpi radialis, palmaris longus, m. flexor carpi ulnaris
 - middle layer – m. flexor digitorum superficialis
 - deep layer – m. flexor digitorum profundus, m. flexor pollicis longus \Leftrightarrow deeply Pirogow-Parona space
 - deepest layer – m. pronator quadratus
 - ✓ neurovascular bundles in the region:
 - radial:
 - a. et v. radialis, r. superficialis n. radialis
 - ulnar: a., v. et n. ulnaris
 - median – two bundles:
 - superficial – n. medianus, a. et v. mediana
 - deep – a. et v. interossea anterior, interosseous antebrachii anterior

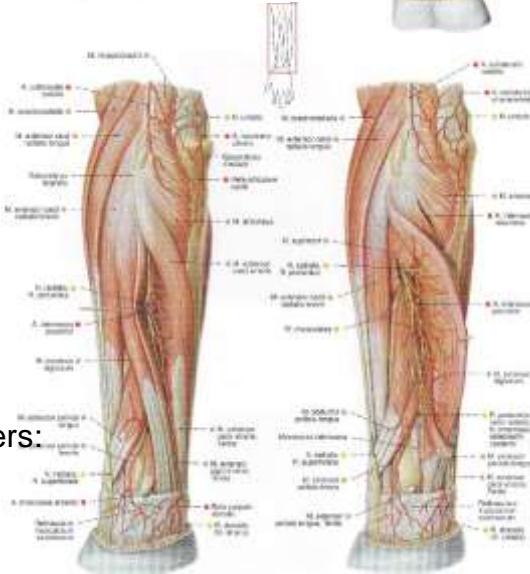

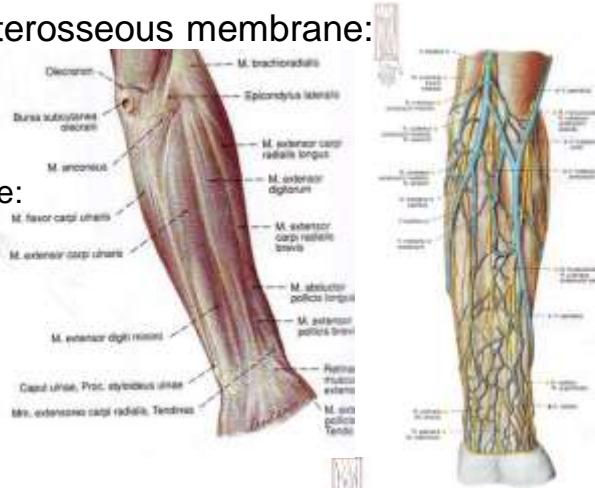

Antebrachium

The posterior forearm region, *regio antebrachii posterior*

- boundaries – behind the forearm bones and interosseous membrane
 - ✓ superior and inferior oblique elevations
 - surface anatomy:
 - ✓ skin – thicker and mobile
 - ✓ subcutaneous layer – sparse fat and loose tissue:
 - venous vessels – *v. cephalica et v. basilica*
 - *n. cutaneus antebrachii posterior*
 - *n. cutaneus antebrachii medialis*
 - *r. superficialis n. radialis* ↳ distal one-third
 - *r. dorsalis manus n. ulnaris*
 - ✓ *fascia antebrachii*
 - ✓ posterior muscle group – two layers:
 - superficial layer – *mm. extensores carpi radialis, longus et brevis, m. extensor digitorum, m. extensor digiti minimi, m. extensor carpi ulnaris*
 - connective tissue space
 - deep layer – *m. supinator, m. abductor pollicis longus, m. extensor pollicis brevis, m. extensor pollicis longus, m. extensor indicis*
 - ✓ neurovascular bundle – between the two muscle layers:
 - *ramus profundus n. radialis*
 - *a. et vv. interosseae posteriores*
 - *a. interossea anterior* – in the inferior part

boundaries

topographic regions

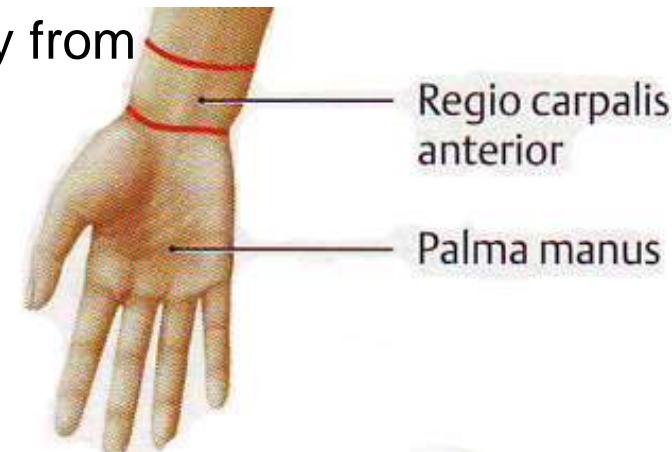

Carpus

The wrist, carpus

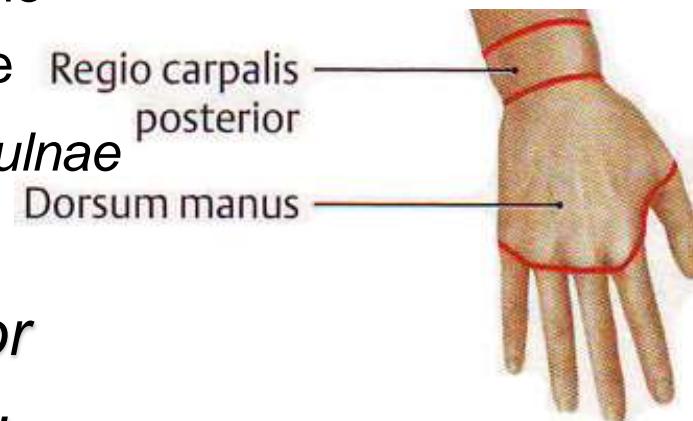

- boundaries:

- ✓ proximal – 1 cm proximally from *processus styloidei, radii et ulnae*
 - ✓ distal – distally from *os pisiforme*

- topographic regions – the longitudinal lines through the *processus styloidei, radii et ulnae* and wrist margins:

- ✓ *regio carpalis anterior*
 - ✓ *regio carpalis posterior*

topography

surface anatomy

Radial artery pulse

Vv. metacarpales palmares,
Rete venosum palmarum

Anterior region of wrist, *regio carpalis anterior*

surface anatomy:

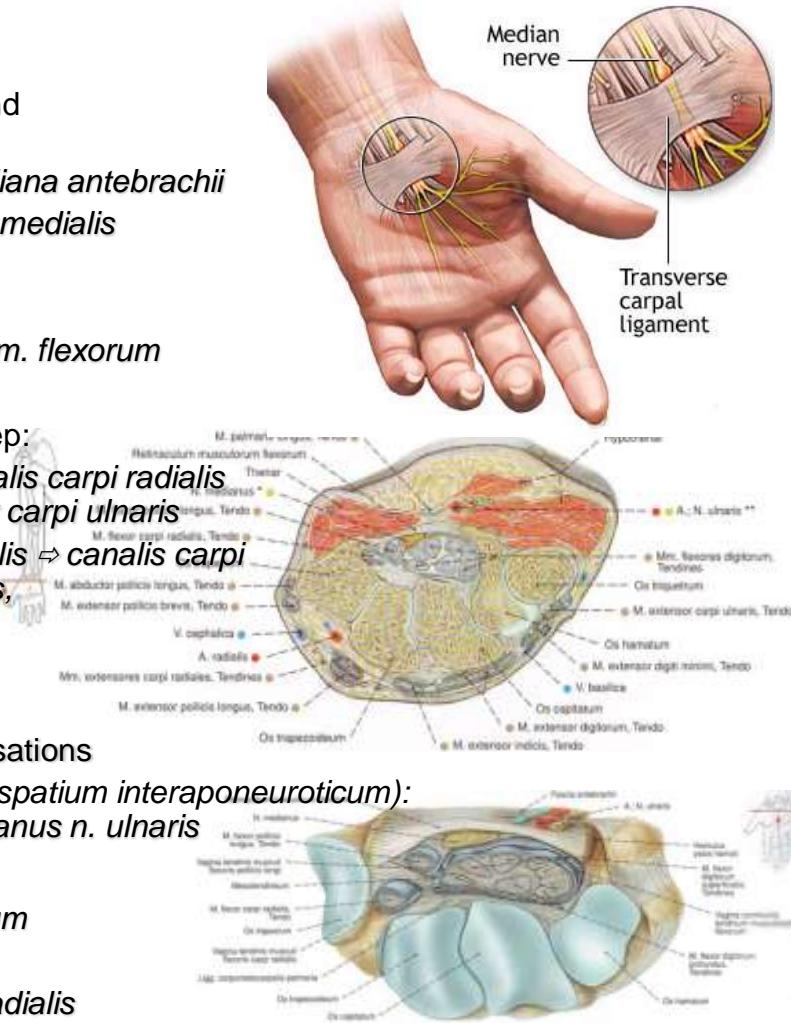

- ✓ skin – thin, smooth and glabrous
- ✓ subcutaneous layer – sparse fat and loose connective tissue:
 - tributaries of *v. basilica* and *v. mediana antebrachii*
 - *nn. cutanei antebrachii, lateralis et medialis*
 - *r. palmaris n. mediani*
 - *r. cutaneus palmaris n. ulnaris*
 - ✓ *fascia antebrachii* \Rightarrow *retinaculum mm. flexorum*
 - ✓ the carpal tunnel, *canalis carpi*
 - ✓ muscle layers – superficial and deep:
 - *m. flexor carpi radialis* \Rightarrow *canalis carpi radialis*
 - *m. palmaris longus, m. flexor carpi ulnaris*
 - *m. flexor digitorum superficialis* \Rightarrow *canalis carpi*
 - *m. flexor digitorum profundus,*
 - *m. flexor pollicis longus*
 - *n. medianus*

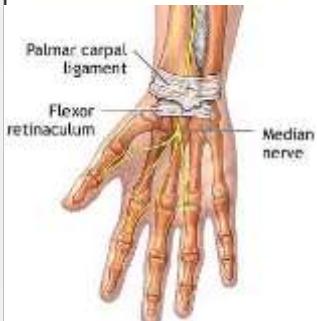

✓ neurovascular bundles:

- radial – *a. et v. radialis* \Rightarrow pulsations
- ulnar – *canalis carpi ulnaris (spatium interaponeuroticum)*:
a. et v. ulnaris, r. palmaris manus n. ulnaris

canalis carpi radialis:

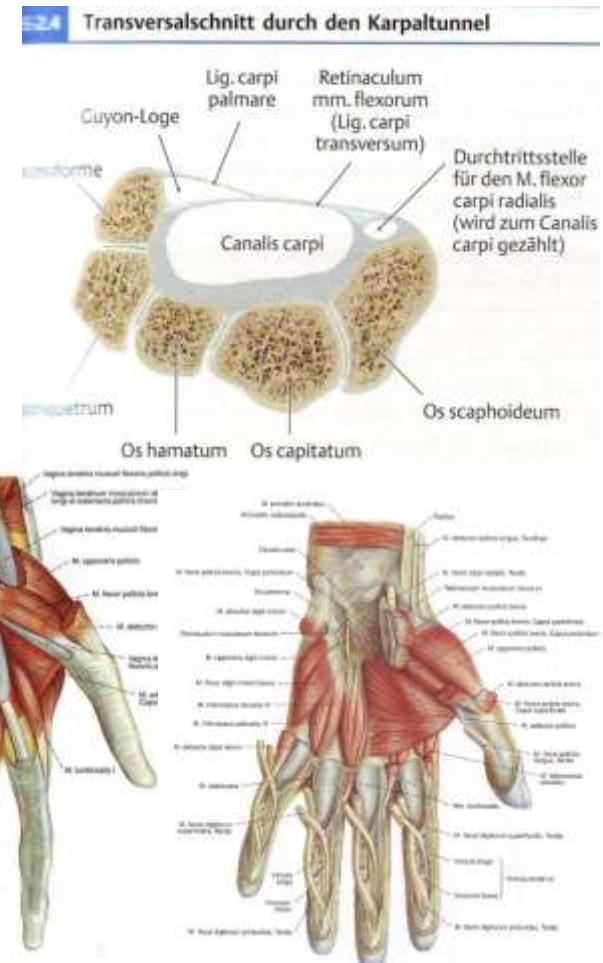

- ✓ *os scaphoideum et os trapezoideum*
- ✓ *retinaculum flexorum*
- ✓ *tendo et vagina m. flexoris carpi radialis*

Canalis carpi

The carpal tunnel, canalis carpi

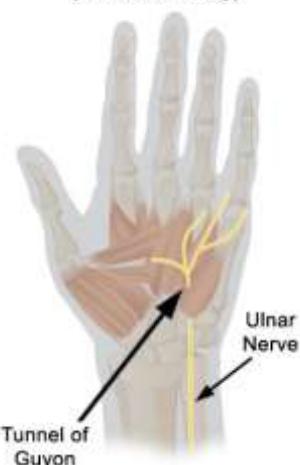

- borders:
 - ✓ *sulcus carpi*
 - ✓ *retinaculum mm. flexorum*
- content:
 - ✓ *vagina tendinis m. flexoris pollicis longi*
 - ✓ *vagina synovialis communis mm. flexorum*
 - ✓ *n. medianus*
 - ✓ *rete carpi palmarum*
- carpal tunnel syndrome:
 - ✓ compression of the median nerve ⇒ pain, numbness, and tingling in the hand and arm

Jean Casimir Félix
Guyon (1831-1920)

Guyon's Canal Syndrome
(Handlebar Palsy)

The ulnar tunnel (Guyon's canal), *canalis nervi ulnaris*

- borders:

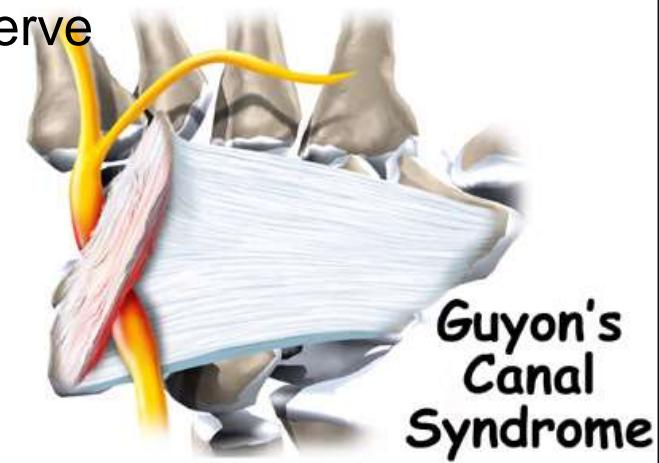

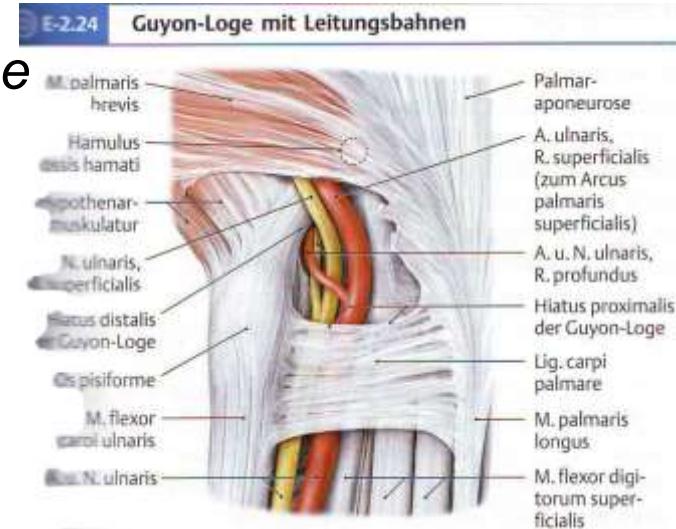

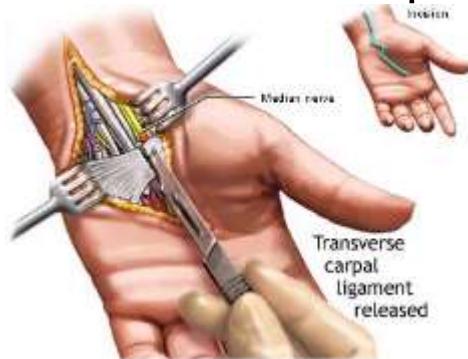

- ✓ *os hamatum et os pisiforme*
- ✓ *lig. carpi palmarum et lig. pisohamatum*

- content:

- ✓ *a. et v. ulnaris*
- ✓ *n. ulnaris – r. superficialis et r. profundus*

- Guyon's canal syndrome:

- ✓ compression of the ulnar nerve
⇒ ulnar nerve entrapment

topography

surface anatomy

Regio carpi posterior

Posterior region of wrist, regio carpalis posterior

important landmarks:

- ✓ radial and ulnar elevations
- ✓ anatomical snuff box

surface anatomy:

- ✓ skin – thin and mobile
- ✓ subcutaneous layer:
 - tributaries of *v. cephalica et basilica*
 - *n. cutaneus antebrachii posterior*
 - *ramus superficialis n. radialis*
 - *ramus dorsalis manus n. ulnaris*

✓ *fascia antebrachii* \Leftrightarrow *retinaculum mm. extensorum*

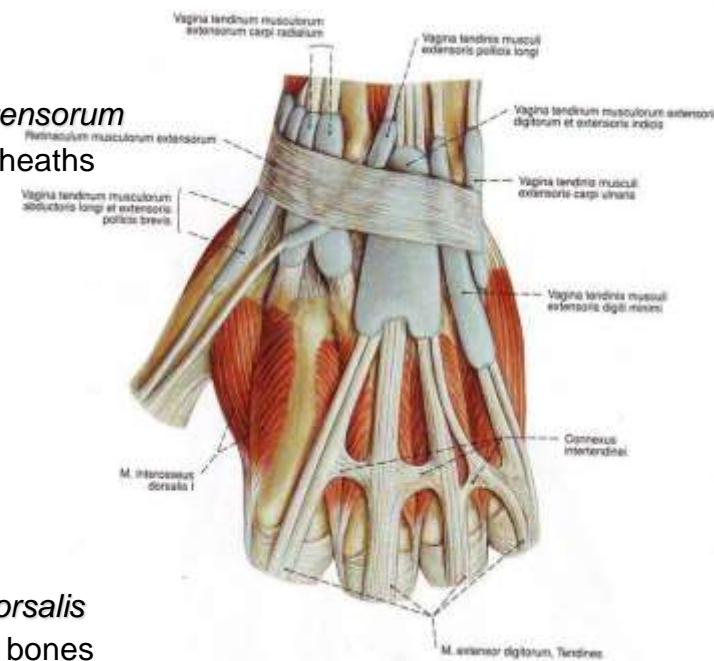

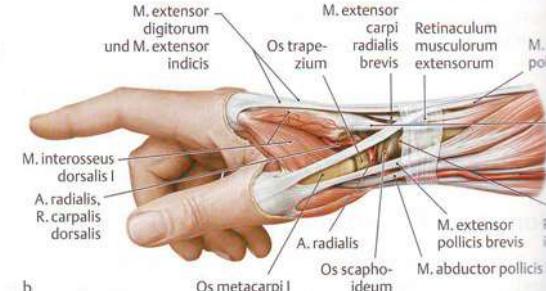

✓ osseofibrous tunnels – synovial tendon sheaths (*vaginae tendinum*):

- I – *m. abductor pollicis longus, m. extensor pollicis brevis*
- II – *mm. extensores carpi radialis*
- III – *m. extensor pollicis longus*
- IV – *m. extensor digitorum, m. extensor indicis*
- V – *m. extensor digiti minimi*
- VI – *m. extensor carpi ulnaris*

✓ the anatomical snuff box:

- *v. et a. radialis* \Leftrightarrow *ramus carpeus dorsalis*
- floor – the scaphoid and trapezium bones

E-2.26 Begrenzung der Fovea radialis (Tabatière)

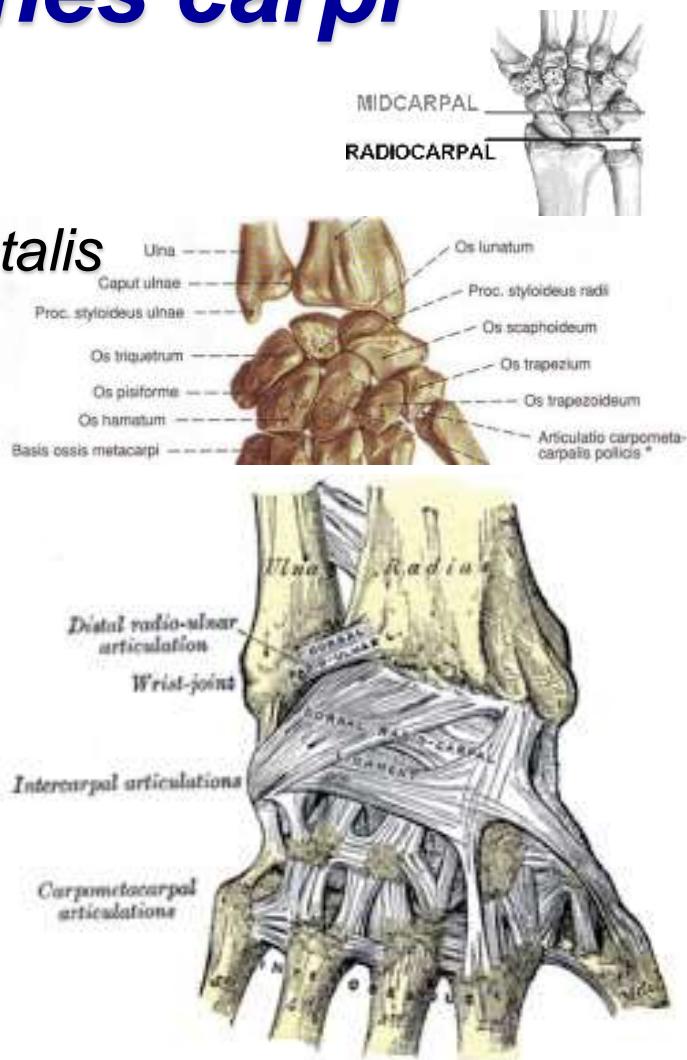

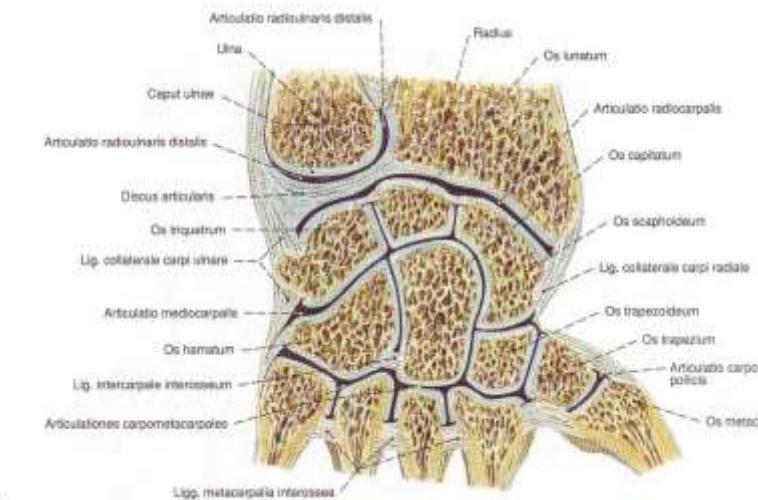

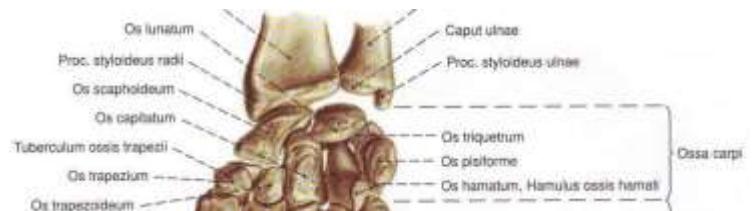

Joints of the wrist, *articulationes carpi*

Osteoarthritis carpi

- ✓ *articulatio radiocarpea*
- ✓ *articulatio mediocarpea*
- ✓ *articulatio radioulnaris distalis*

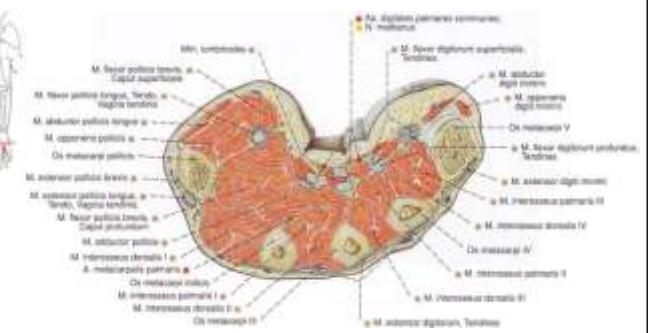

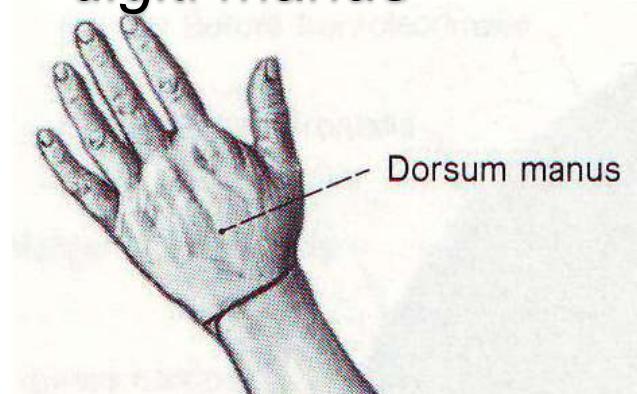

borders

topographic regions

Manus

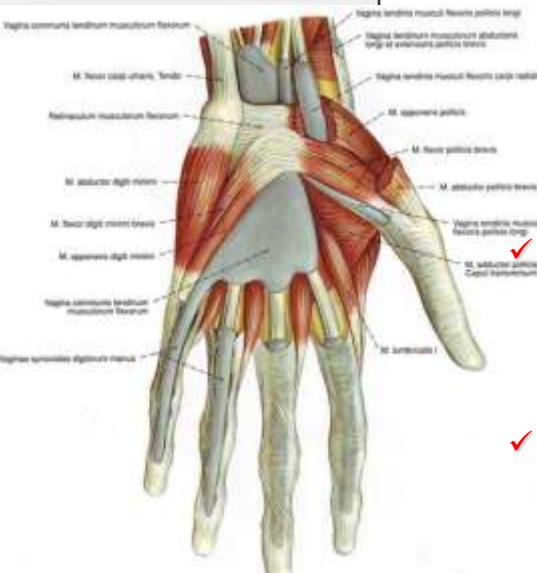

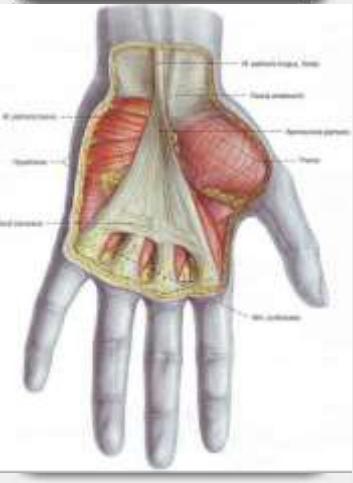

- distally from the wrist
 - borders:
 - ✓ proximal – the line distally from the pisiform
 - topographic regions:
 - ✓ the palm, *palma manus*
 - ✓ the back (dorsal side) of the hand, *dorsum manus*
 - ✓ fingers of the hand, *digiti manus*

topography

surface anatomy

The palm, palma (vola) manus

borders and landmarks:

- ✓ ahead and between the metacarpals, distally from the pisiform
- ✓ medial and lateral eminences, *thenar et hypothenar*
- ✓ commissural pads – in the distal portion

surface anatomy:

- ✓ skin – thick and glabrous
 - three skin lines
- ✓ subcutaneous layer – abundant fat and fibrous tissue:
 - *r. palmaris n. mediani, r. cutaneus palmaris n. ulnaris*
 - the palmar aponeurosis – superficial and deep layer
 - lateral intermuscular fibrous septum
 - medial intermuscular fibrous septum
 - fascia of the palm
 - deep palmar space
- ✓ lateral (thenar) compartment – four muscle layers:

- *m. abductor pollicis brevis, m. opponens pollicis, m. flexor pollicis brevis (caput superficiale), tendo m. flexoris pollicis longus (vagina synovialis), m. flexor pollicis brevis (caput profundum), m. adductor pollicis*
- *r. muscularis n. mediani* ⇒ forbidden zone
- *r. palmaris superficialis a. radialis*
- superficial and deep space

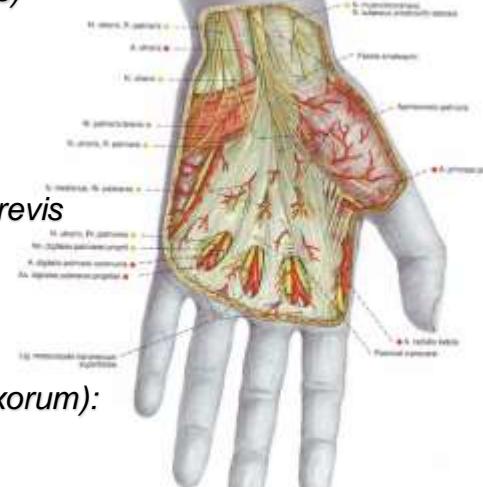

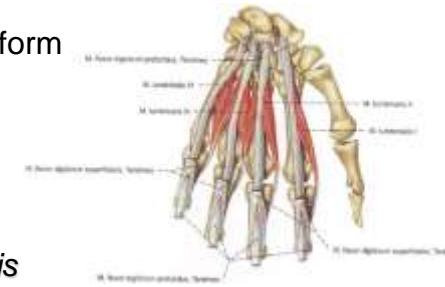

medial (hypothenar) compartment – two muscle layers:

- *m. abductor digiti minimi, m. flexor digiti minimi brevis, m. opponens digiti minimi*
- *r. palmaris n. ulnaris*
- branches of *a. et vv. ulnares*
- *m. palmaris brevis* – outside the compartment

central compartment:

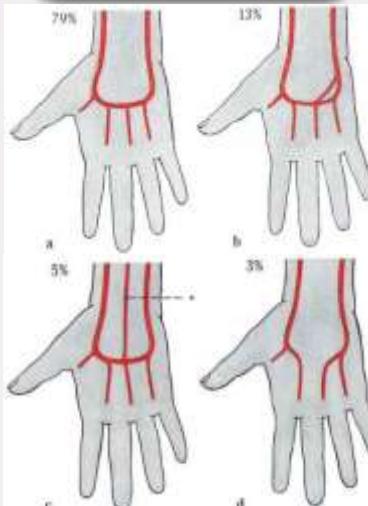

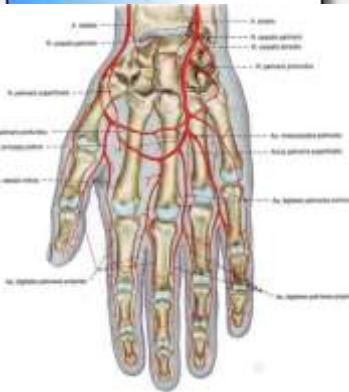

- muscle tendons (*vagina synovialis communis flexorum*):
- *m. flexor digitorum superficialis et profundus*
- *mm. lumbricales*
- the thenar and midpalmar space

adductor compartment (the deepest muscular plane) – the adductor pollicis

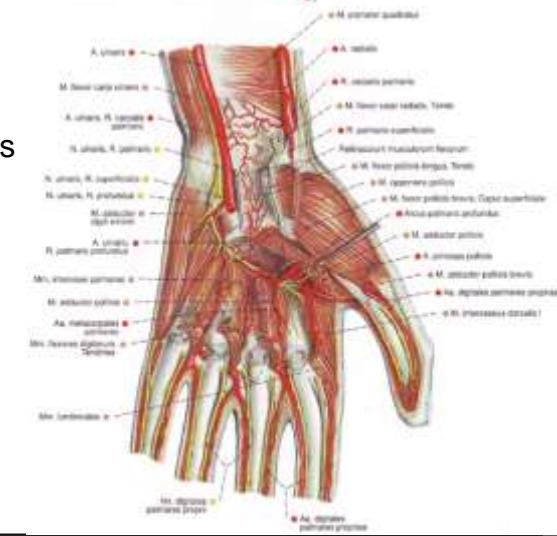

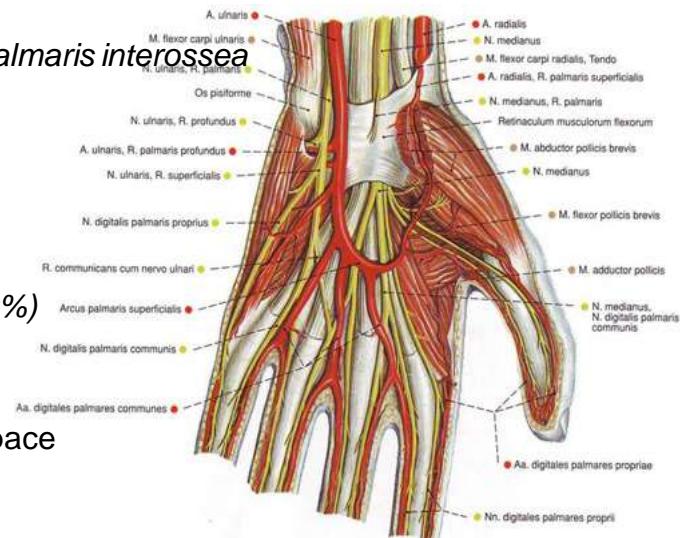

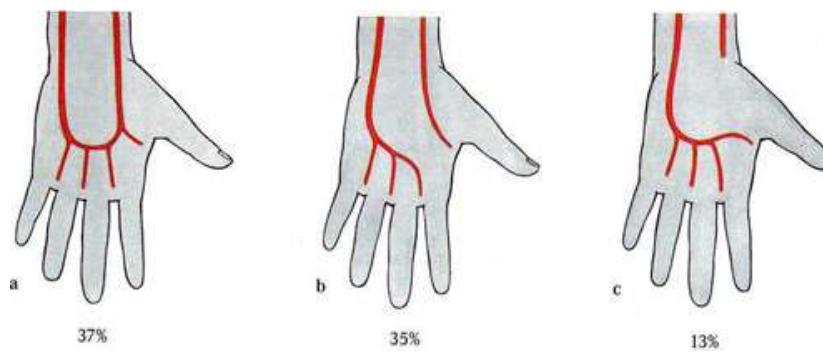

Connective tissue spaces

Arcus palmares

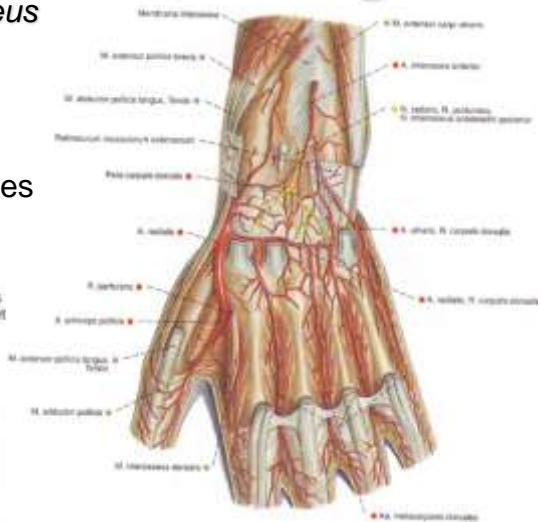

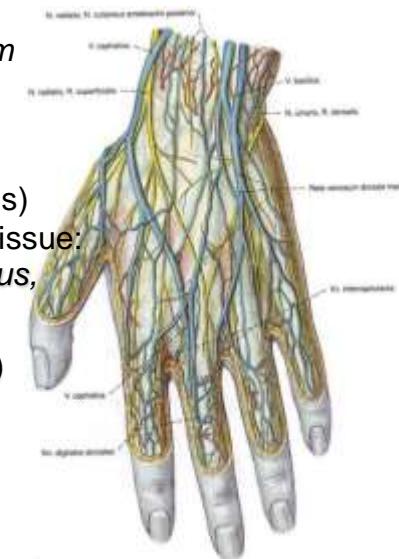

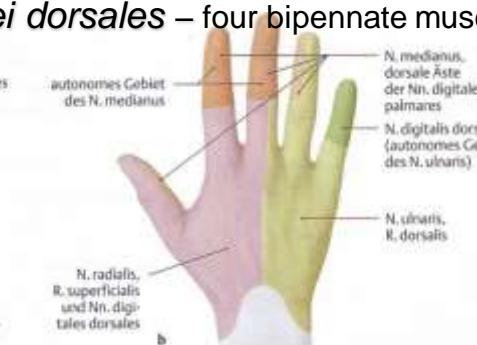

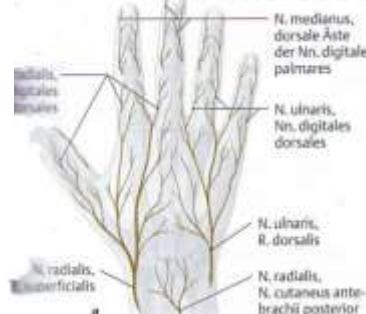

- superficial space:
 - ✓ between *aponeurosis palmaris* and *fascia palmaris interossea*
 - ⇒ interfascial canals – distally
 - content:
 - ✓ *aa. et vv. digitales palmares communes*
 - ✓ *nn. digitales palmares communes* ⇒
nn. digitales palmares proprii
 - ✓ *arcus palmaris superficialis*:
 - *a. ulnaris* (60%)
 - *r. palmaris superficialis a. radialis* (30%)
 - *a. mediana* (10%)
 - deep (infratendon) space:
 - ✓ three *aa. et vv. metacarpeae palmares*
 - ✓ communication with the Pirogov-Parona space
 - deep compartment of the palm:
 - ✓ beneath the *fascia palmaris interossea*
 - ✓ *arcus palmaris profundus*:
 - *a. radialis*
 - *r. palmaris profundus a. ulnaris*
 - ✓ *rr. perforantes* ⇒ *aa. metacarpeae dorsales*
 - ✓ *r. palmaris profundus n. ulnaris*
 - ✓ *mm. interossei palmares* – three unipennate muscles

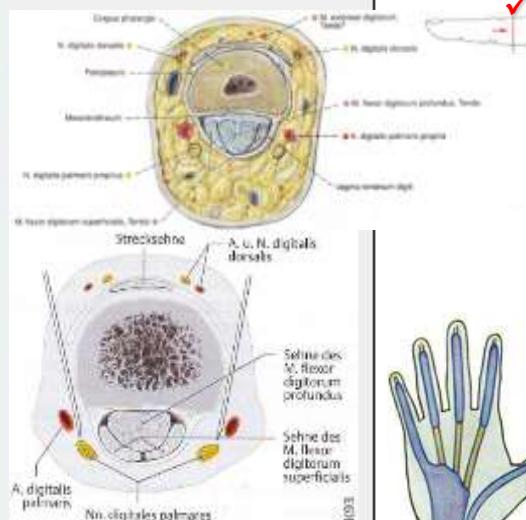

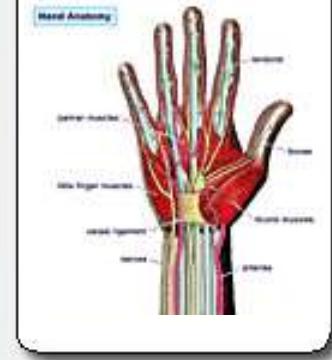

Dorsum manus

- borders:
 - ✓ corresponds to the palm, distally from *retinaculum extensorum*
 - ✓ soft tissues behind the hand skeleton
 - surface anatomy:
 - ✓ skin – thin, glabrous and mobile
 - longitudinal elevations (metacarpals and muscle tendons)
 - ✓ subcutaneous layer – loose connective tissue, absent fat tissue
 - *vv. metacarpeae dorsales* \Rightarrow *rete venosum dorsale manus*
 - *arcus venosus dorsalis manus*
 - *nn. digitales dorsales* – median internerve line
 - (*r. superficialis n. radialis et r. dorsalis manus n. ulnaris*)
 - ✓ fascia dorsalis manus – thin and though,
lamina superficialis et lamina profunda
 - ✓ muscle layer – extensor muscles tendons:
 - *mm. extensores pollicis, brevis et longus*
 - *m. extensor indicis*,
 - *m. extensor digitorum – connexus intertendineus*
 - *m. extensor digiti minimi*
 - ✓ subfascial vessels:
 - *a. radialis*
 - four *aa. metacarpeae dorsales*
 - ✓ *mm. interossei dorsales* – four bipennate muscles

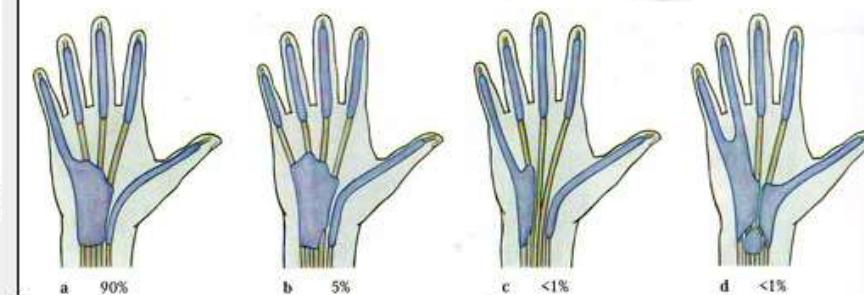

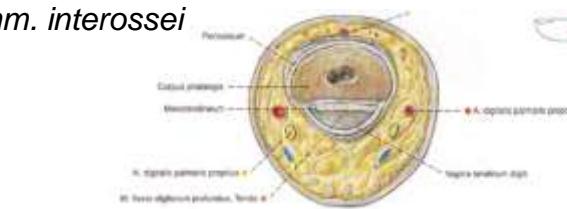

Digiti manus

■ Surface anatomy:

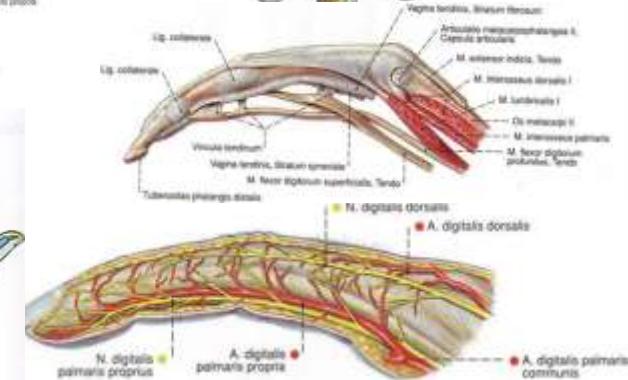

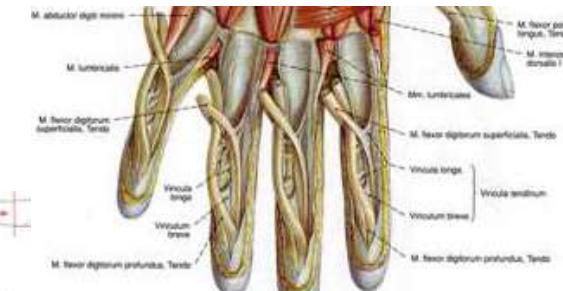

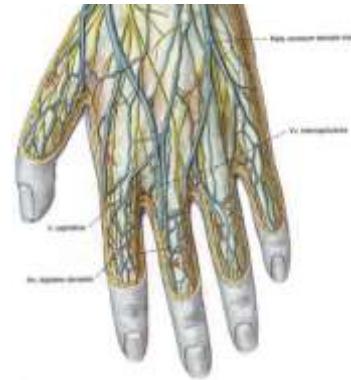

- ✓ skin – dorsally thin and mobile, ventrally thick and sleekly, no hairs and sebaceous glands, abundant sudoriferous glands, sensory receptors, both encapsulated and unencapsulated
- ✓ subcutaneous tissue – abundant lobulated fat tissue palmarly, scant loose and adipose connective tissue dorsally:
 - anastomosing venous network, predominantly dorsally
 - neurovascular bundles – two palmar and dorsal each:
 - palmar – aa. et nn. digitales palmares proprii
 - dorsal – aa. et nn. digitales dorsales
- ✓ fascia manus – synovial sheath, *vagina fibrosa*
- ✓ vagina synovialis tendinis – palmarly in tendon sheaths:
 - mesotendineum
 - vincula tendineum

✓ aponeurosis dorsalis – tendons of:

- m. extensor digitorum
- mm. lumbricales
- mm. interossei

Fingers, *digiti manus*

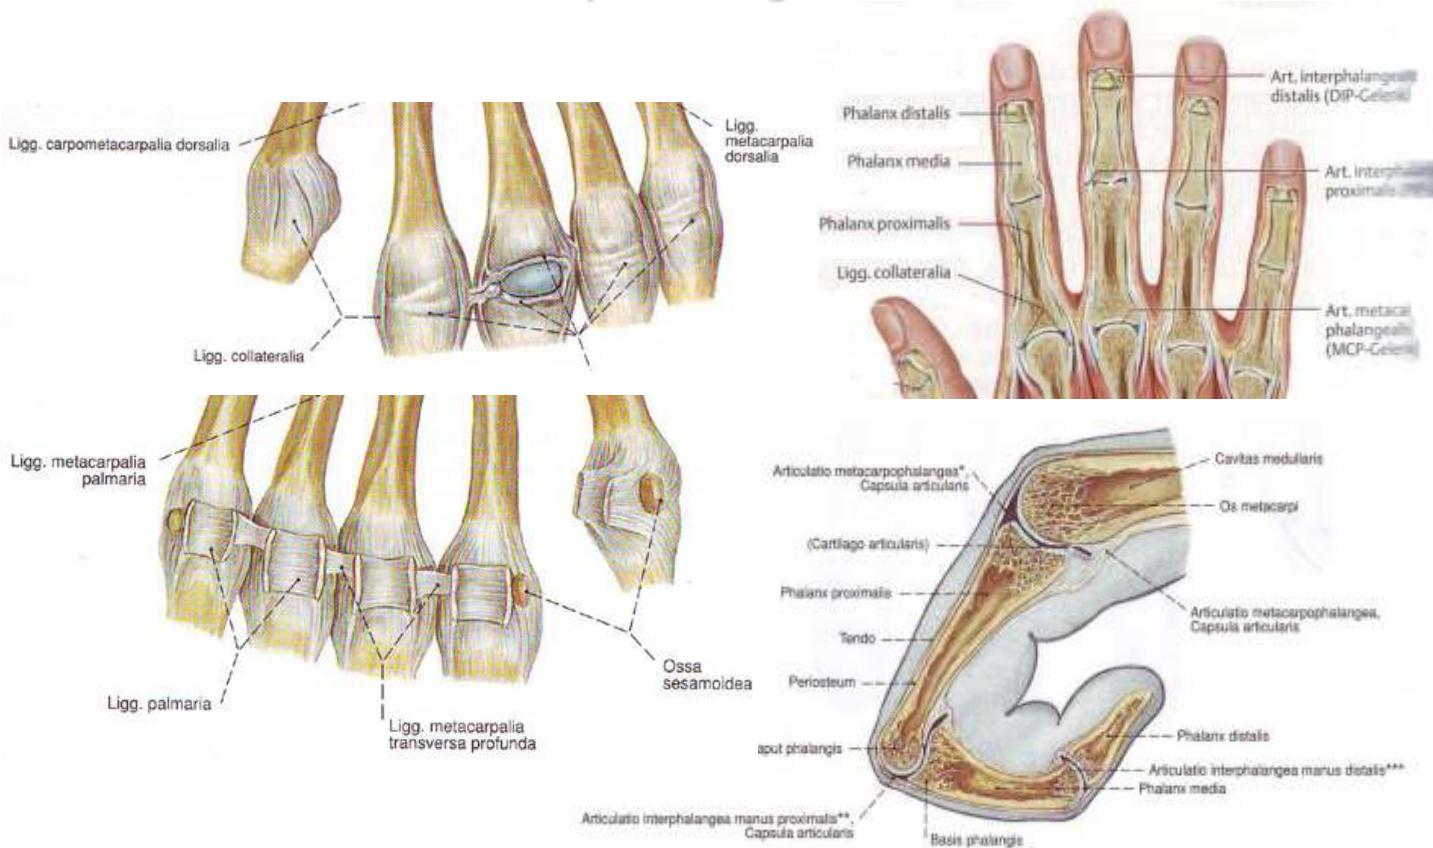

**Articulationes
digiti**

Finger joints, *articulationes digitorum*

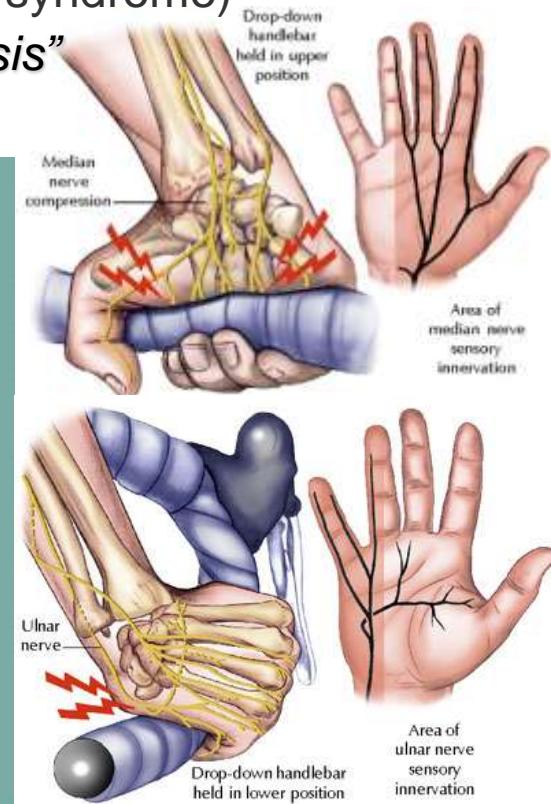

- ✓ *articulationes metacarpophalangeae*
- ✓ *articulationes interphalangeae manus*

Clinical significance

- Nerve injury to:

- ✓ *n. ulnaris* – ‘claw hand’ = causing paralysis of the lumbricals, handlebar palsy – cyclist’s hands
- ✓ *n. medianus* – “*accoucheur’s hand*”, median neuropathy (Carpal tunnel syndrome)
- ✓ *n. radialis* – “*Saturday night paralysis*” wrist drop

Thank you ...

Prof. Nikolai Lazarov
